

Dr. Andy Williams

Deputy Technology Executive Officer for Space - Air Force Research Laboratory

Dr. Andrew 'Andy' Williams is the Deputy Technology Executive Officer for Space at the Air Force Research Laboratory responsible for integrating and executing AFRL's space science and technology investments to deliver cutting edge technical capability to the U.S. Space Force.

Prior to his selection as the D-TEO, Williams served as the Space Mission Area Lead for AFRL's Space Vehicles Directorate, coordinating the lab's customer engagement strategy and ensuring synchronization with the tech needs of USSF, Space Operations Command, and Space System Command. He also led engagements with partners in the Department of Defense, the Intelligence Community, industry, and academia.
